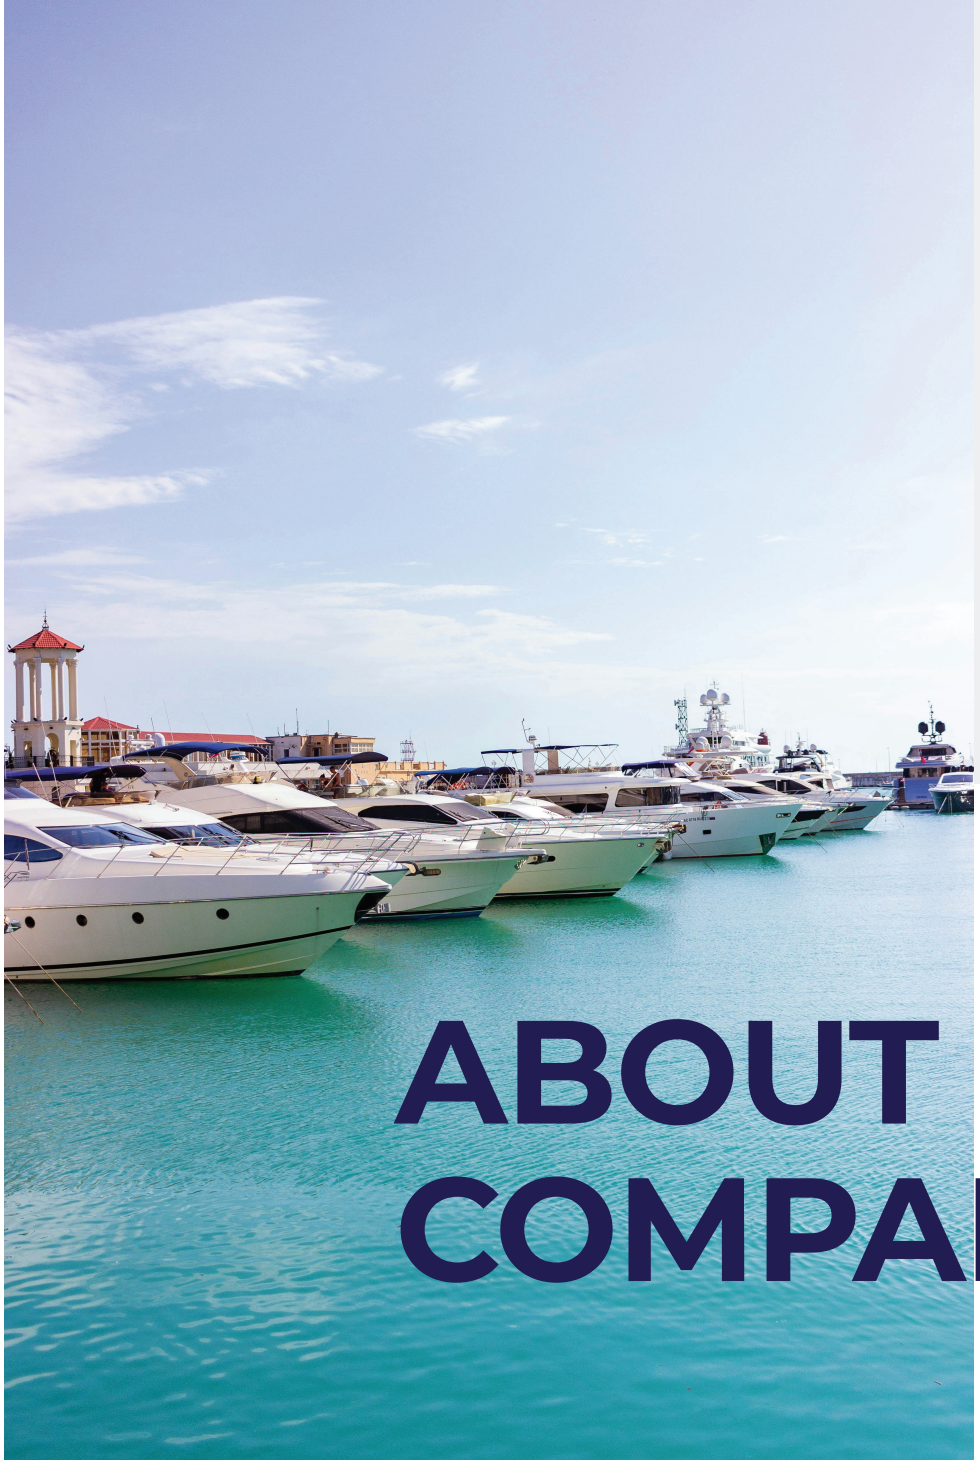
ARGEMAR

MARIN & HYDRAULIC

ENGINEERED FOR THE SEA, BUILT FOR PERFECTION.

SPECIALIZED HYDRAULIC RELIABILITY:
Trust Built on 27 Years of Engineering Integrity.



ABOUT COMPANY

As Argemar Marin, drawing strength from our deep-rooted experience of over 27 years in the maritime industry, we approach every project not just as a manufacturer, but as a solutions partner with meticulous diligence and engineering expertise. Our company has become the hallmark of superior reliability and innovation in marine equipment, embracing the latest technologies and global quality standards (ISO).

CUSTOMIZED SOLUTIONS

Providing bespoke design and engineering services from scratch, tailored to each vessel's structure and the client's request.

SUPERIOR QUALITY AND MATERIAL

Utilizing stainless steel and premium hydraulic components with high resistance to seawater in all our products.

AFTER-SALES RELIABILITY

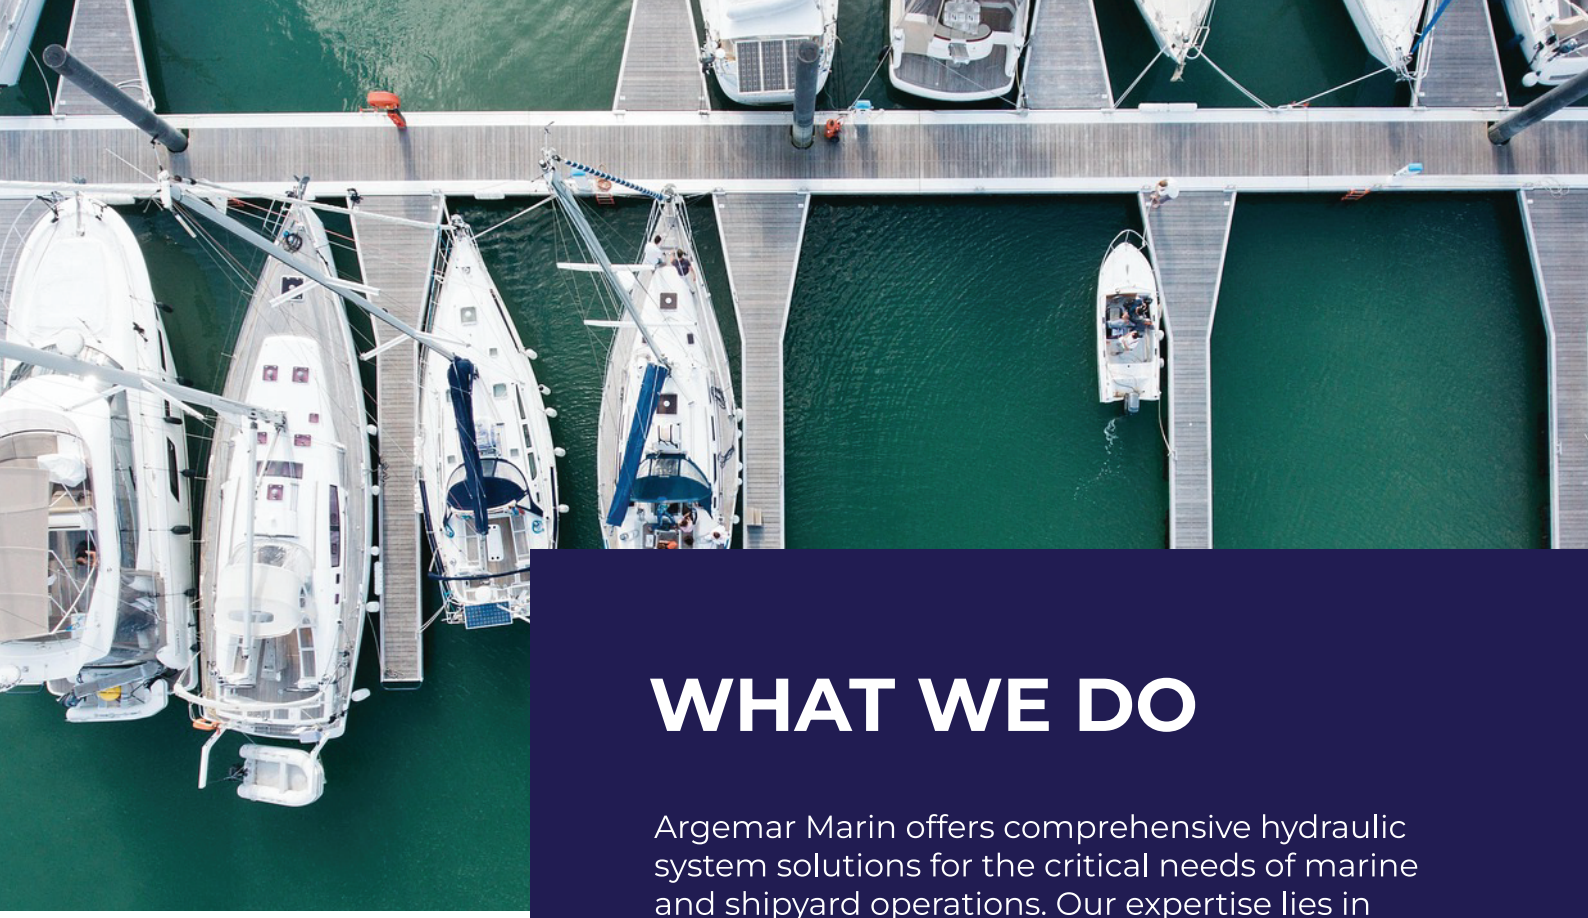
Ensuring comprehensive and prompt technical support, including installation, maintenance, and spare parts supply.

OUR MISSION

Our mission is to design and produce safe, long-lasting marine equipment that combines aesthetics and functionality by applying the highest engineering standards. Our core responsibility is to remain customer-focused, offering flexible and rapid solutions tailored to specific needs in every project we undertake.

OUR VISION

Our vision at Argemar Marin is to become a globally recognized, leading brand in the field of hydraulic systems and special marine equipment within the maritime sector. We aim to offer value-creating solutions that exceed our customers' expectations through innovation, continuous development, and a commitment to uncompromised quality in manufacturing.



WHAT WE DO

Argemar Marin offers comprehensive hydraulic system solutions for the critical needs of marine and shipyard operations. Our expertise lies in developing aesthetic, safe, and durable equipment for all types of marine vessels, from luxury yachts to commercial ships.

MARINE SOLUTIONS

Design and manufacture of hydraulic equipment that provides deck access and connection to the sea for yachts, including gangway, crane, and platform systems. (Covers: Gangway, Crane, Platform, Balcony and Terrace)

SHIPYARD MOTION

Specialized, high-capacity transport vehicles developed for the land transport and maneuvering of heavy loads and vessel hulls in shipyard environments. (Covers: Amphibious Vehicles, Towed Trailers, Self-Propelled Diesel Vehicles)

HYDRAULIC POWER

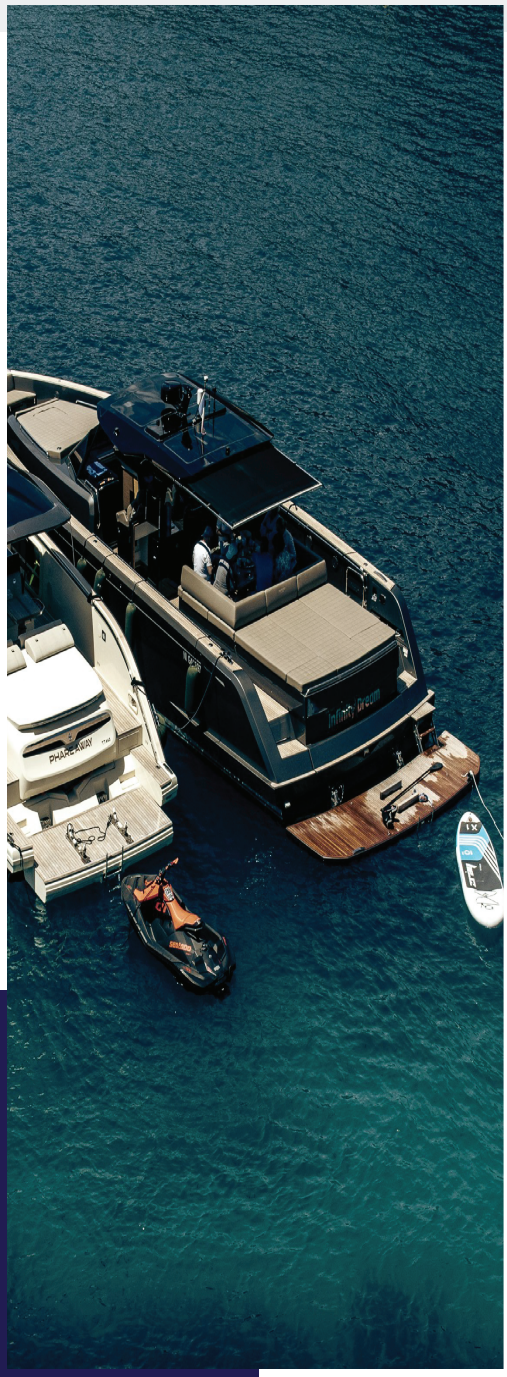
Special hydraulic cylinders made of stainless steel suitable for the marine environment, and compact power units compatible with vessel voltage to feed these cylinders. (Covers: Special Cylinders, 12V/24V Power Units)

INTEGRATED HYDRAULIC SOLUTIONS UNITING SAFETY, AESTHETICS, AND OPERATIONAL EXCELLENCE, BACKED BY 27 YEARS OF MARINE EXPERTISE.

ARGEMAR
MARIN & HYDRAULIC

MARINE SOLUTIONS

As Argemar Marin, we provide integrated hydraulic solutions designed with the highest level of engineering precision for the maritime industry. Our MARINE SOLUTIONS range offers safety, comfort, and operational efficiency for luxury yachts and commercial vessels. Our stainless steel systems are built to withstand the harshest marine environments.



GANGWAY & ACCESS

Rotary System Gangway
Hydraulic Folding Gangways
Telescopic Gangways
Sea Ladder
Maroon Stairs
Safe Gangway
Fixed Jetty Access Bridges
Automatic Height-Adjusting Gangways

MARINE PLATFORMS

Foldable Swim Platform
Moving Platform
Fixed Platform
Hydraulic Lifting Platforms
Transom Platform Extensions
Tender Garage Platform Systems

BALCONY AND TERRACE

Fold-Down Deck Balcony Systems
Hull Side Opening Terraces
Tailgate / Transom Door
Side Door / Hull Access

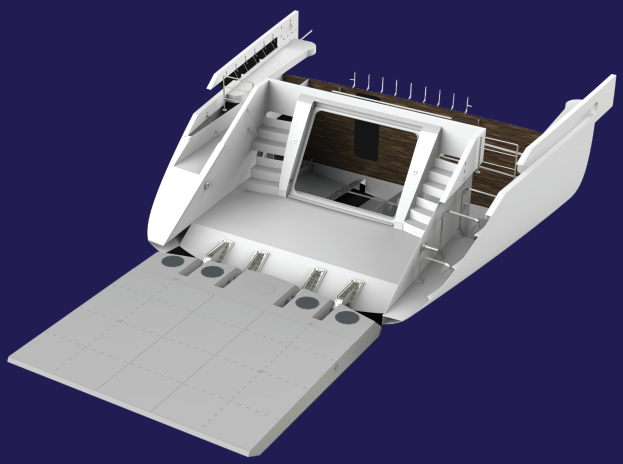
CRANE & LIFTING

Standard Crane
Crane with Column
Hydraulic Knuckle Boom Cranes
Davits / Rescue Boat Cranes

PRODUCT LINE

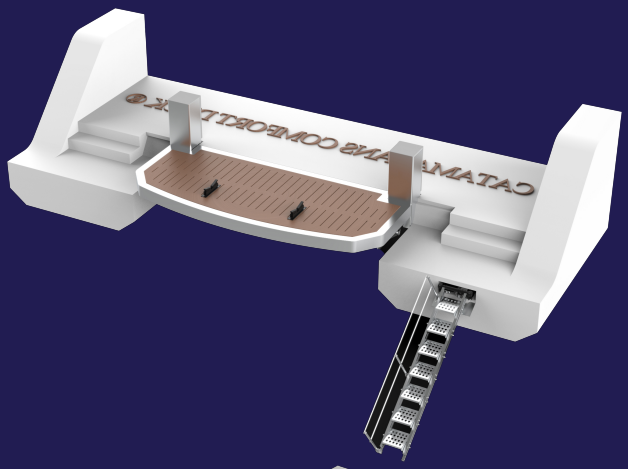
MOVING PLATFORMS

Foldable or fixed hydraulic swimming platforms that extend the swimming and sunbathing area, with a submerging function for easy access.



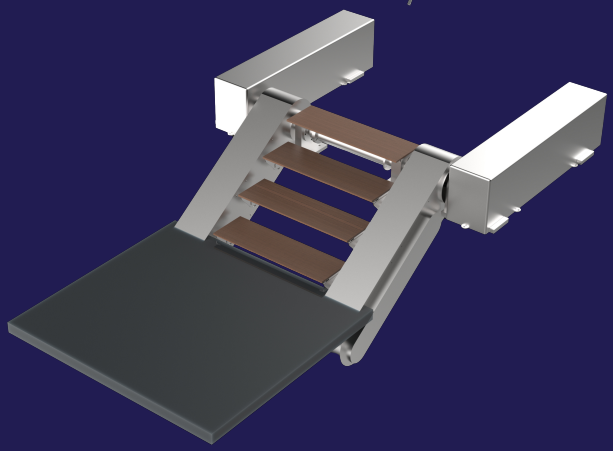
HYDRAULIC LIVING SPACES

Luxurious balcony and terrace systems that automatically deploy from the yacht hull. Special solutions offering a secure, stylish, and extended enjoyment of the sea.



SEA LADDERS

Automatic and manual ladder solutions, made from materials resistant to the marine environment, developed for safe and comfortable access to the sea.



GANGWAY SYSTEMS

Offering secure and stylish deck access with rotary or straight type, remote-controlled, stainless steel-bodied gangways. Custom production for every yacht type.

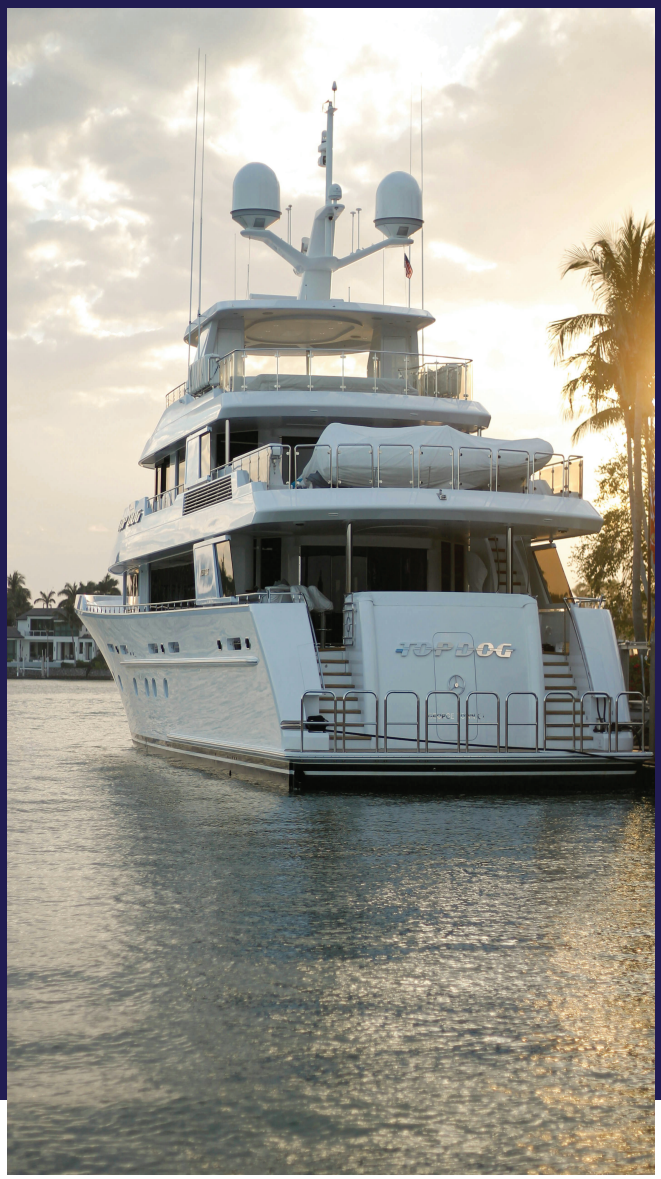
MARIN & HYDRAULIC

HYDRAULIC POWER

The hydraulic power—the unseen heart of motion and lifting systems—is engineered with Argemar Marin expertise. The integrated power systems we develop guarantee maximum efficiency, precision, and reliability. High-performance Hydraulic Power Units (HPUs) and marine-grade stainless steel cylinders ensure the flawless movement of critical components like gangways, cranes, and platforms, even in the harshest sea environments. Each system is custom-engineered to align with the existing electrical infrastructure and power demands, providing superior pressure and flow control. These fundamental Hydraulic Power Systems establish the technical foundation for the long-lasting and flawless operation of all your marine solutions.



POWER UNITS

Custom Designed Compact HPUs
Variable Displacement Pump Units
Diesel Engine Driven HPUs

CONTROL & VALVES

Custom Manifold Blocks
Proportional Valve Systems
Pressure and Flow Control Valves

ACTUATORS & CYLINDERS

Marine Grade Stainless Steel Cylinders
Single / Double Acting Cylinders
Telescopic Cylinders

SYSTEM INTEGRATION

Seawater Cooled Heat Exchangers
High-Pressure Piping
Oil Filtration Units

PRODUCT LINE

STANDARD MARINE CRANES

Designed for safely lowering and retrieving tenders and watercraft. Compact and highly durable crane solutions mounted on the deck.

RETRACTABLE GANGWAYS

Hydraulic gangway systems that can be fully concealed by being integrated into the yacht's hull, providing secure and stylish deck access when deployed.

SHIPYARD BOAT TRAILERS

Trailer and transport systems used for moving boats from sea to shore or vice versa, featuring high maneuverability within the shipyard area.

HYDRAULIC DAVIT SYSTEMS

Strong hydraulic lifting arms, specifically designed for tenders and produced from stainless steel to match the yacht's aesthetic lines.

ARGEMAR
MARIN & HYDRAULIC

SHIPYARD MOTION

Argemar Marin integrates turnkey and highly reliable motion systems for modern shipyards and marinas. Our solutions are developed through a rigorous engineering process that begins with analyzing the facility's ground resistance, load distribution, and operational capacity. Our goal is to increase operational efficiency during vessel haul-out, winterization, and launching processes by ensuring precise positioning and maximum safety. Our custom-designed hydraulic carrier systems and lifting mechanisms are manufactured to meet your critical logistics requirements. Upon project completion, we guarantee the long-term, flawless operation of our solutions with comprehensive on-site installation and system optimization services, all under the Argemar guarantee.

VEHICLES & TRAILERS

Our Amphibious Shipyard Vehicle
Our Towed Trailer Vehicle
Our Self-Propelled Diesel Vehicle

LIFTING & HANDLING

Heavy Tonnage Boat Slings
Custom Lifting Arm Designs
ensitive Positioning Equipment

POWER COMPONENTS

Special Shipyard Cylinders
High-Pressure Power Units
Remote Control Valve Systems

CONTROL & SAFETY

Wireless Remote Control Systems
Automated Braking Systems
Load Sensing Technology

PRODUCT LINE

AMPHIBIOUS SHIPYARD

Specialized transport solutions designed for moving on both land and water, safely towing and transferring vessel hulls from sea to shore and vice versa.

TOWED TRAILER SYSTEMS

Durable trailer units optimized for safely moving heavy loads and large boat molds within the shipyard area with high maneuverability.

SELF-PROPELLED DIESEL

Powerful and efficient diesel transport vehicles controlled by an operator, capable of independently carrying out high-tonnage lifting and transporting operations.

CUSTOM LIFTING EQUIPMENT

Specially manufactured hydraulic systems for lifting and placement purposes required for unique needs in the shipyard or marina. Maximizes operational efficiency at sea.
